

HONDA
GENUINE PARTS

2

APPLICATION OF PARTS LIST

This is a list of parts used on the HONDA 50
Model Z50A

1. How to read the Part Number

The composition of Part Number is as follows.

(Example)

2. How to Order Parts

When placing orders to us, inform us the correct part number by referring to this Part List.

When changing parts, check the frame number, then the parts used can be found.

3. Regarding the News Number

News number is the number of the Parts News issued by Honda Service Division. Refer to the Parts News when you need to know the contents of modified parts and related parts in detail.

4. This Parts List can be revised with Revision Sheet

Keep this Parts List up-to-date by replacing or inserting Revision Sheets issued periodically.

Please put the Revision Sheet in the place of each page according to instruction shown at the bottom of the sheet.

If you make sure of this, the Parts List will be kept always up-to-date.

5. Parts with ● marks.

Those parts with ● marks in the text as well as in the index are either newly introduced or changed items in this issue.

6. This Parts List was compiled as of 25th January, 1969 and covers the changes announced by the Parts News up to No. 9003.

ISO THREADED PARTS

- Not interchangeable with the previous threaded parts -

Threaded parts used in this model conform to the Thread Standard of ISO (International Standardization Organization), and are different from those used in the earlier models.

For servicing this model, therefore, tool set for the earlier models is not sufficient. Socket or box wrenches for 5.5 mm, 7 mm, 12 mm, 22 mm, 24 mm and 27 mm in width across the flats will become necessary.

ISO threads with 3 mm, 4 mm, 5 mm and 12 mm thread diameters are different in pitches from the earlier threads, therefore, confused use of threaded parts will result in damages to threads.

Change in pitch

Thread Diameter	Earlier Pitch	ISO Pitch
3 mm	0.6	0.5
4 mm	0.75	0.7
5 mm	0.9	0.8
12 mm	1.5	1.25

Width across flat

Pitch

Thread diameter

How to identify ISO threaded parts

For easy identification, the following markings are made on the new ISO threaded parts.

Hex. bolts  ← Presence of figure on the bolt head

Cross screws  ← Semi-spherical embossement on the head

Nuts  ← Semi-spherical dimple

They can also be identified by the part numbers.

92000 - 08012 - OA

Those parts with this marking at the end of the part numbers are of ISO threads.

For further details, please refer to Service Bulletin No. 004 dated April 20, 1967.
